

Company Overview

GEXECL . Geomatics & Excellence

BUSINESS TEAM

LOCATION

Gexcel offices are located in Italy in two Innovation Centers

OUR STRENGTH

Products fully compatible with all the main scanner data formats from different manufacturers.

CLAUSS

FARO

STONEX

TOPCON

Velodyne

ZF
Zoller-Fröhlich

SALES NETWORK

Gexcel's products are spread all around the world thanks to a dense sales network.

PARTNERSHIP

Gexcel is involved in several R&D projects to develop customized and/or innovative solutions and products.

EUROPEAN COMMISSION - JOINT RESEARCH CENTRE

TECHNOLOGY TRANSFER

Joint Research Centre and Gexcel

The first technology transfer agreement between the European Commission Joint Research Center (EC-JRC) and Gexcel started in 2007 to introduce the nuclear plants monitoring lidar technology into the market.

Young researchers moved out from the EC-JRC and co-founded Gexcel.

From this fruitful agreement was born the JRC 3D Reconstructor[®] software, nowadays completely developed by Gexcel.

The history continues...

This successful collaboration is now continuing with a new technology transfer agreement, signed to industrialize and optimize the HERON® wearable mobile surveying system.

Gexcel engineers and European Commission researchers have closely collaborated to the HERON® system, developed under a license of the European Commission Joint Research Centre.
